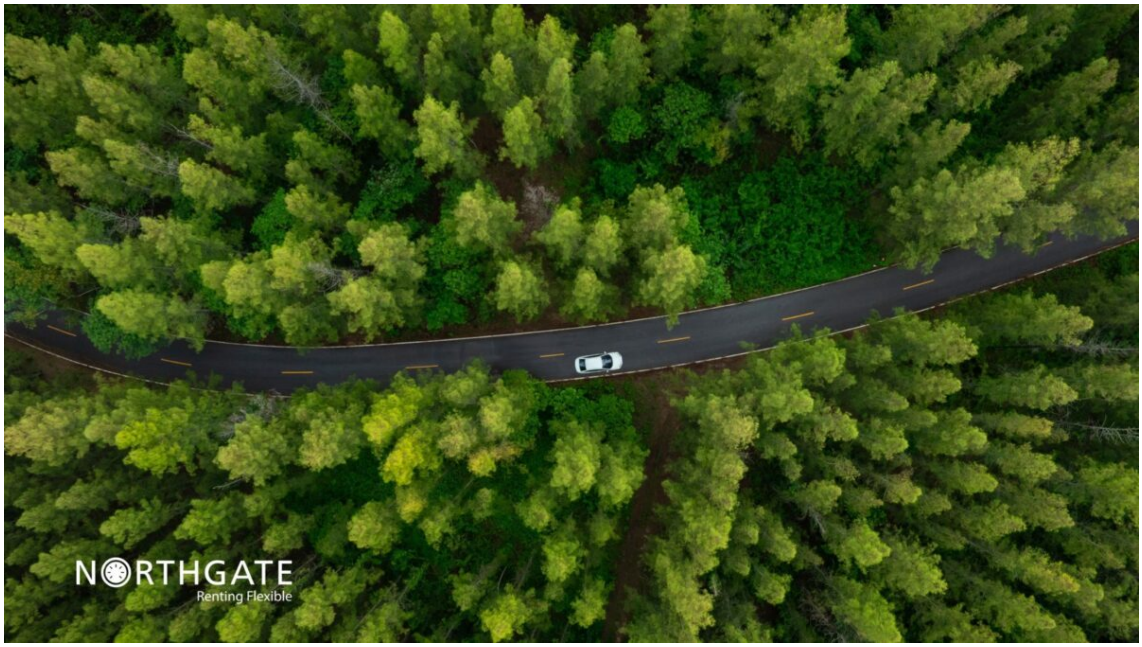
Northgate Renting Flexible cuts direct emissions by 12%

Comunicados | 27/11/2026 | 14:00



Its latest Sustainability Report, based on its Non-Financial Information Statement (EINF), sets out the results for the 2025-26 financial year and its decarbonisation plan for the next five years. The plan forms part of ZIGUP Group's commitment to reaching net-zero emissions by 2050, with interim targets for 2035

Its latest Sustainability Report, based on its Non-Financial Information Statement (EINF), sets out the results for the 2025-26 financial year and its decarbonisation plan for the next five years. The plan forms part of ZIGUP Group's commitment to reaching net-zero emissions by 2050, with interim targets for 2035

Northgate Renting Flexible, a company specialising in flexible vehicle rental, has published its Sustainability Report for the 2025-26 financial year. It details the company's environmental, social and governance progress and summarises matters analysed in its Non-Financial Information Statement (EINF). The company outlines its role in facilitating the transition to a circular, decarbonised economy, alongside improvements to its facilities and initiatives to promote its employees' development and well-being.

Environmental impact: a 12% reduction in direct emissions

At national level, Northgate says it has reduced its Scope 1 emissions by 12% compared with the

previous financial year and recorded zero Scope 2 emissions. The company also has an electricity supply backed by renewable energy guarantees of origin and is working to improve the efficiency of its facilities.

Also noteworthy is the continuation of its Northgate Forests initiative. Since 2022, it has held reforestation events in which customers, employees and family members volunteer to plant native trees. The initiative has resulted in more than 5,000 trees being planted and more than 800 tonnes of CO2 mitigated.

The environmental measures introduced are aligned with the global goal of ZIGUP Group, of which Northgate is a part, to achieve net-zero emissions by 2050. To that end, the Group has set two interim targets for 2035: to reduce absolute Scope 1 and 2 emissions from its operations and purchased energy by 47.3%, and to reduce absolute Scope 3 emissions by 23.1%.

Unique infrastructure and the transition to more sustainable fleets

Northgate, whose fleet has exceeded 80,000 vehicles, has increased its fleet of electrified vehicles by 41% during the 2025-26 financial year. By providing these vehicles on a flexible basis with no minimum commitment, Northgate facilitates its customers' transition to more sustainable fleets.

As for its infrastructure, the company reports four new openings. Its facilities also have an internal network of 70 chargers and 150 electrified parking spaces.

Promoting talent and professional development

On the social front, the report highlights an increase in its workforce of 5%, bringing it to 1,475 employees, and says it devoted more than 24,000 hours to training during the financial year. In addition, more than 270 people took part in its corporate internship programme, with 25% going on to join the company.

Social commitment

In the Sustainability Report, the company says it has worked closely for years with non-profit organisations such as the Red Cross, Fundación Altius and Menudos Corazones.

Focus on customer experience

The report also highlights customer approval, which the company measures systematically. The recommendation rate reached 48.1% for the company’s main service, business vehicle rental, while satisfaction scored above 8 across all business areas.
